
Omega Systems Expands Healthcare MSP Leadership with Acquisition of PEAKE Technology Partners

Together, the companies will deliver focused managed services, deeper HIPAA compliance and clinical AI expertise to help healthcare organizations secure data and enhance patient outcomes

Reading, PA (NOV 5, 2025) – [Omega Systems](#), a leading provider of managed IT, cybersecurity and compliance services to regulated industries, today announced the acquisition of PEAKE Technology Partners, a healthcare managed services provider specializing in compliant technology solutions for healthcare providers and practitioners across the Mid-Atlantic.

The acquisition strengthens Omega’s position as a leading MSP and MSSP for the healthcare industry, expanding its technical capabilities, regional footprint, and understanding of the IT, artificial intelligence, and regulatory compliance challenges facing medical practices, physician groups, and other healthcare organizations nationwide.

“PEAKE brings deep healthcare expertise, customer focus, and they share our core values and people-first culture,” said Omega Systems CEO Mike Fuhrman. “Together, we’re better positioned than ever to help healthcare providers and practitioners enhance care delivery with confidence – offering solutions that protect data, improve operations, and ultimately support better patient outcomes.”

Founded in 2014 and based in Bowie, Maryland, PEAKE provides comprehensive managed IT services, data security, compliance, and cloud solutions designed exclusively for healthcare organizations. The company’s specialized knowledge of EHR management, AI-driven healthcare tools, HIPAA and HITECH compliance, and clinical IT operations complements Omega’s own portfolio of managed support, managed security, and compliance-as-a-service offerings.

“Joining Omega Systems is an opportunity to extend the healthcare excellence that has long been at the heart of PEAKE,” said Chris Knotts, Founder & CEO of PEAKE. “By combining our deep industry expertise with Omega’s scale and security innovation, we’ll empower healthcare organizations to navigate a rapidly changing cyber landscape and meet shifting HIPAA requirements with greater trust and reliability.”

This is Omega’s first acquisition since announcing its [partnership with Revelstoke Capital Partners](#) in January 2025. The move comes during a year of significant momentum for Omega – including multiple national MSP and MSSP awards, such as the prestigious CRN Triple Crown Award, and the launch of [Smart Secure Edge](#), the company’s cloud-native managed SASE solution.

Earlier this year, Omega also [published new research](#) highlighting the impact of cybersecurity threats on patient outcomes, reinforcing the urgent need for healthcare organizations to strengthen defenses and modernize compliance. The integration of PEAKE’s healthcare expertise further positions Omega as a trusted partner for healthcare providers navigating this transformation.
